NOTICE TO PATRONS.

I hereby notify all my customers

CALLED FOR 7" "Dr. Pierce's preparations," he replied.
"They are sold under a positive guarantee that they will, in every case, give satisfaction, or the money is promptly refunded. His 'Favorite Prescription,' for all those chronic weaknesses, nervous and other derangements peculiar to women, is used with unfailing success. It cures weak back, bearing-down sensations, irregularities and weaknesses common to the sex, and being the most perfect of tonic medicines builds up and strengthens the entire system. The demand for it is constant, and I am conversant with scores of cases cured by it."

Returning after a few moments' absence, the venerable wielder of the pestie remarked, "the number of sarsaparillas and other, so-called, 'blood medicines' is legion; but Dr. Pierce's Golden Medical Discovery outsells them all and it is the only blood-purifier out of the many which I am obliged to keep upon my shelves, that is guaranteed to benefit or ours in all cases for which it is recommended, or money paid for it is refunded."

"In the line of Pills," remarked the old gentleman, "the little Sugar-coated 'Pelleta' put up by Dr. Pierce lead all others, both in amount of seles and the general satisfaction they give my customers." reporter of an old druggist.

Copyright, 1888, by WORLD'S DIS. MED. ASS'M. for an incurable case of Ca-tarrh in the Head by the proprietors of Dr. Sage's Catarrh Remedy. By its mild, soothing and healing properties, its cures the worst cases, no matter of how long standing. By druggists, 50 cents.

Junction City.....

And made it Possible to Restore Defective Evesight to Normal Vision. Astigmatism is due to irregular shape of eye, and is usually congenital. Many school children with this defect are called stupid, but with properly fitted ginsees they may become the brightest of scholars. This is quite a common and dangerous defect.

EYE-METER

This is quite a common and dangerous defect.

Hypermetropia is a malformation which heeps the chiary muscle in constant use, whereas in a normal eye it is at re t when looking at a distance. This defect is neglected may result in nervous depression and pain, and even prestration.

Myopia is a diseased condition of the eye which should be very carefully fitted to prevent an increase of the defect and perhaps ultimate blindness.

Presbyopia is a loss of accommodation in the eye which may cause entaract unless corrected by artificial sid.

Frequent nervous or sich headaches and also serious illness are brought on by one ro more of the above defects.

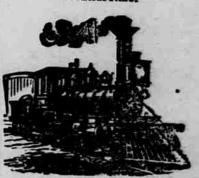

ER Remember no charge for testing you eyes.
